### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 01 January 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### CLAIMS PRESENTED

Claims 1-21 are presented.

### *Response to Arguments*

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection. [www.opengroup.org/rfc/mirror-rfc/rfc71.0txt](http://www.opengroup.org/rfc/mirror-rfc/rfc71.0txt) (Rfc) is cited for this purpose.

### CLAIM REJECTIONS

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over [www.opengroup.org/rfc/mirror-rfc/rfc71.0txt](http://www.opengroup.org/rfc/mirror-rfc/rfc71.0txt) (Rfc) and Entrust, <http://www.entrust.com/news/files/5312.htm> and NTS and FSSA and Win2000.

Regarding claim 1, NTS and FSSA and Win2000 teach as noted in the previous Office Action. Entrust teaches such smart card providing security levels as recited (i.e., quote from Bob Heard, the fifth from the bottom paragraph: "Datakey smart cards can handle multiple profiles, certificates and key pairs."). Such multiple profiles show that

Art Unit: 2134

multiple security levels are handled. Entrust teaches this feature for the motivation of “enhancing the security (another quote from Bob Heard).”

Applicant asserts that the motivation to combine smart cards and non-smart card access (“if smart card is not being used”) does not exist in the prior art. Rfc provides such motivation (section 4.0 OVERVIEW OF SMART CARD SYSTEM DESIGN, the third paragraph, i.e. “If passwords are to co-exist with smart card access ... login script would indicate which of the keys the authentication server should use ...”). The passage does note that a strong authentication would not be served by such co-existence but also provides mechanisms for a weaker authentication when such a weaker authentication is desired.

Hence, it would have been obvious to those of ordinary skill in the art at the time of the claimed invention to combine the teachings of the references for the motivation (for having an option for a weaker authentication) noted in the previous paragraphs so as to teach the claimed invention.

The other limitations of the other claims have been noted in the previous Office Action. For these reasons, claims 2-21 are not patentable.

### ***Conclusion***

The art made of record and not relied upon is considered pertinent to applicant's disclosure. The art disclosed general background.
